### **ZWEIG WHITE NAMES HOT FIRMS LIST**

**October 2007 BOSTON, Massachusetts** -- Management consulting and research firm ZweigWhite Information Services identified the 200 fastest-growing U.S. architecture, engineering, and environmental consulting firms for its annual ranking, The Zweig Letter Hot Firm List. This annual list features the design and environmental firms that have outperformed the economy and competitors to become industry leaders.

The Zweig Letter 2007 Hot Firm List is based solely on gross revenue for both fiscal year 2003 and fiscal year 2006, as verified by financial statements or income tax returns reviewed by third parties. The list is limited to firms based in the United States and Canada deriving the majority of their revenue from the practice of architecture, engineering, planning, environmental consulting, or allied disciplines.

Wallace Engineering was honored with the #111th position on the Hot Firms list.

Mark Zweig, founder and director of ZweigWhite, says, "The firms that made this year's Hot Firm List should be proud. Firms that commit to revenue growth while investing in marketing, information technology, and other infrastructure are usually the most successful in our industry. They have shown they have the ability to sustain their success, year after year. The hottest firms in the business—those with consistent growth and success at outperforming the economy and their peers—are the ones that attract top staff and the best clients."
